**THE PROPOSED NATIONAL HEALTH AND SAFETY  
LAWS WILL PUT AUSTRALIAN WORKERS AT RISK.**

Unions are gravely concerned that proposed national workplace health and safety laws will favour big business at the expense of workers. With the Federal Government now seeking public comment, we only have a short time to voice our concerns and influence decisions.

**We ask you to sign up and add your support to laws that:**

- **Give workers a say** • **Make employers responsible** • **Empower health and safety representatives**
- **Respect the role of unions** • **Enable injured workers and their unions to take court action.**

**YES**

***I'm very concerned that the proposed national health and safety laws could put Australian workers at risk.***

Please register my concern and keep me up to date with the union campaign for safer workplaces.
