Defend Workers' Rights and Conditions Defend Community Living Standards

The Federal Government's new industrial laws will destroy working people's hard won rights, working conditions and living standards in our communities. These have all been won in struggles over past 150 years by previous generations of workers and communities standing in solidarity with each other.

Come to the Western Suburbs Community and Unions Solidarity Picnic and show the Federal Government and big business that working people and their communities will continue to stand together to defend our hard won rights and conditions.
